

February Newsletter 2010 – “Think Spring”

Dear Valued Customer,

With spring just a few weeks away, our schedule is filling up quickly. Please call us as soon as possible to schedule your spring services!

Many of our customers are on our full maintenance program. This way you can *bundle* your services together, save time, money, and eliminate the hassle of dealing with several different companies to maintain your landscape. We can take care of your mowing, mulching, landscape bed maintenance, fertilizing, weed control, pruning, leaf removal, tree and shrub spraying, injection root feeding, aerification, sprinkler start-up and shut-down, floral design, and a variety of other landscaping services. All for one low monthly payment! When you sign up for a full maintenance program, our uniformed professional, trained personnel can take care of all aspects of your landscape maintenance. Site reviews are also performed on a regular basis.

Remember now is a great time for planning for spring and summer. In the upcoming months, we will be applying weed pre-emergent in the landscape beds, crab grass pre-emergent for turf, edging, cleaning out landscape beds, and cutting back perennials. Please let us know if you have any special dates in mind for mulching your landscape beds now, before our schedule fills up.

Please visit paramountlandscaping.com to view our photo gallery. We can design and install new additions or renovations. We ensure that our pavers, walks, landscape lighting, irrigation systems, plants, and sod/seed are installed correctly. We stand behind our work.

We are also offering a few new products that can enhance your landscape:

- Artificial Turf – We can install artificial turf in strategic areas as well as design and install artificial putting greens.
- Weathermatic Irrigation Controller – Waters your landscape based on weather conditions, soil type, plant type, and slope, which is more beneficial, saves water, and lowers your water bill.
- Outdoor Living Spaces – Grill islands, fire pits, fireplaces, screenings, landscape lighting, and water features can be designed and installed for your outdoor enjoyment.

We appreciate your business and are looking forward to pleasing you in 2010. Please feel free to call us at (513) 984-5200 for scheduling, free estimates, or with any questions or comments.

Have a Great Day!

Thank you.
