

June Newsletter- *May Showers Bring...*

This May has been almost as rainy as the near record-breaking rain in April. Everyone is ready for some much needed sunshine. Let's hope that June brings some sunshine and warmer, more pleasant weather.

Landscaping projects can be a smart investment which can bring enjoyment and value to your home or business. Paramount can help you create a beautiful landscape designed to enhance your property. Our designers are very talented and highly trained. They are very knowledgeable of various plants and flowers. Our designers know which plants look appealing and which plants grow best together. Many of our larger landscape projects are designed with a CAD software program that includes 3-D animations. These designs are complete with butterflies and chirping birds. You can even feed the fish in your pond on the virtual tour of your future landscape. Our turnkey projects can include: retaining walls, seat walls, outdoor fireplaces, paver patios, water features, grill islands, landscape lighting, plants, and flowers. Our designers' priority is to meet customer needs and strive to produce the best possible results.

Currently, we are completing the large project at Kenmore Towers. The project will be completed early for their Grand Opening, June 9th. The Pfefferle family's backyard is our next Paramount project. Our designers and technicians will be making significant major improvements to create a beautiful landscape oasis for the family to enjoy.

The planning and scheduling process may take some time in this busy season. The finished product, however, is well worth the wait. In a blink of an eye, you will see your landscape transform once your project is up and running. After the project is completed, we can help you maintain your investment with a full maintenance contract. So you can just sit back and enjoy the view of your beautiful landscape.

We are heading into Summer quickly which usually begins long periods of hot dry weather. There are two words that come to mind: "Sprinkler System!" Paramount Sprinkler Systems are designed and installed by our experienced technicians. We also spend many hours on training and product knowledge so we can create the perfect custom-made sprinkler system for your home.

The Paramount team would like to welcome "Case!" On May 20th, Sara, our office manager, gave birth to her beautiful son. You can see Case on Paramount's "Meet the Team" page on our website.

Just a few quick reminders!

- The month of June is a great time for pruning.
- Please call today to schedule your fall seeding.
- We are still gladly accepting customers for our Fertilization Program.
- It is also a great time for Tree and Shrub Applications and Injection Root Feedings for your plants to be as healthy as possible and to withstand the hot, humid Summer weather.
- We encourage you to call our office with any questions about any of our services.

We appreciate all the patience that our customers have given us during this wet weather. We would not be here without your support and truly appreciate it. Please visit us at www.paramountlandscaping.com and like us on Facebook. Have a great June, and enjoy your Summer!

Thank You,
Joe Tekulve
President/Owner
