

September Newsletter 2010 – “Fall Preparation”

Dear Valued Customer,

Seeding, Lawn Renovations, and Lawn Aerations are three very important services that are best performed in the Fall. Many lawns have suffered extensive damage from the heat and drought stress this Summer. Paramount Lawn and Landscape can revitalize your lawn with an aeration and over-seeding or with a complete lawn renovation. Also, remember that we always guarantee the results of these services when you have a sprinkler system. Call us today at (513) 984-5200 for more information on these services or for a free estimate!

Sprinkler Systems – Proper watering is crucial for a healthy lawn and landscape. Paramount Lawn and Landscape can design, install, and service an “intelligent” sprinkler system that will deliver the proper amount of water at the correct time to your lawn and landscape plants. Our system also includes a **5-Year Warranty**. Sprinkler winterizations and shut downs are coming in the months ahead, and we will be calling to schedule these services.

Landscape Lighting – With the time change around the corner, we are already experiencing shorter periods of daylight. Now is a great time to consider a landscape lighting package. Our LED lights use 1/3 of the electricity of normal lights and have a **15-Year Warranty**. We can design and install a lighting package to suit your specific home and landscape. Call our office today at (513) 984-5200 for a free estimate.

Water Features – Paramount Lawn and Landscape offers some of the best water features in the tri-state. We can install pond-less water features as well as ponds complete with waterfalls and fish. There are several options available. Please call our office at (513) 984-5200 for more details.

Landscape Installation – The Fall is a great time to have landscaping projects performed. Fall is the best time of the year for planting new trees, shrubs, and landscape plants. The Fall season offers optimal weather and perfect conditions for planting.

Lawn and Tree and Shrub Care – Remember when you are on our Fertilization Program III, Ornamental Tree and Shrub Program II, and on our Injection Root Feeding Program your lawn and landscape will be getting fed with high quality, slow release fertilizer, and will be protected from damaging insects such as the Emerald Ash Borer, Asian Longhorn Beetles, Grubs, Aphids, and Japanese Beetles.

Full Maintenance Program – Please consider, if you have not already, bundling your services together. Paramount Lawn and Landscape can take care of everything: mowing, weed control, fertilization, pruning, mulching, sprinkler service, aeration, tree and shrub spraying, injection root feeding, and several additional services for one low monthly payment.

We look forward to providing you with one of these exciting services in the future. Please call us with any questions or concerns at (513)984-5200. We appreciate your business!

Happy Labor Day and Have a Great September!

Thank you.
