

WATER! WATER! WATER!

This is the time of year to either drag your hoses out or set your sprinkler system. Watering turf with a minimum of one inch of water per week is a basic rule of thumb. That's over 600 gallons of water per 1,000 square feet of turf! Evergreens usually need the least amount of water and annuals often need the most.

Paramount can design and install an automatic sprinkler system for your lawn and landscape which will improve the health and value of your landscaping investment. We use all RainBird products which include a 5-year warranty, the best in the industry. We are a Certified Irrigation Contractor (CIC) and a Certified Landscape Irrigation Auditor (CLIA) through the Irrigation Association. We also have a Certified Backflow Tester through the State of Ohio. Call Dennis Eppert at 984-5200 for pricing and scheduling.

When we install a sprinkler system, we pull the pipe underground with a vibratory plow instead of open trenching. You can hardly tell we were there when we finish the installation.

The bad vs the good. The photo on the left is NOT the way we install systems. This method requires extra steps after installation to repair the lawn. The photo on the right shows what it looks like when we install systems. Using a vibratory plow, we pull the pipe underground without disturbing the surface of your lawn.

Paramount installs the control box. A backflow is permitted and installed by a certified plumber. We will run through the system with you and show you how it works.

Paramount offers 12-month zero-interest financing on your sprinkler system as well. Simply call Cindy Jencks at 984-5200, and she will set you up with the financing. It's easy and only takes a few minutes.

Please call us for any of your landscaping needs. If we can't help you, we will point you in the right direction.

We appreciate your business and hope you have a wonderful June!

Thank You,

Joe Tekulve
