

FINALLY! A BREAK IN THE WEATHER!

The weather has been a huge contrast from last year but is actually not too far from normal. We are behind on degree days, or "warming up," and this can be good. One benefit to a later Spring is that there is a lesser chance of early flowering trees and shrubs getting hit by frost. Magnolias, Forsythias, Pear Trees, and other flowering plants have a good chance of showing their best colors this year. Spring Bulbs like tulips and daffodils should be beautiful this year. Check out the tulip display at the Cincinnati Zoo in a week or two. Very impressive!

No Weeds! Matt and Doug are working diligently to apply the first round of fertilizer with crab grass pre-emergent. They are both licensed through the Ohio Department of Agriculture as commercial applicators for Turf, as well as Trees and Shrubs. The second round will include another crab grass pre-emergent application that has some post control, along with fertilizer and broadleaf weed control. I just saw my first Dandelions last Friday. The second round of our lawn care fertilization program will take care of Dandelions, Clover, Chickweed and other broadleaf weeds. Remember, we need broadleaf weeds to "be there" first before we can kill them so your patience is appreciated. We don't want to shoot until we see "the whites of their eyes."

We have been installing LED landscape lights and can barely keep up with the demand: Twelve lights for \$2700 including the astronomic timer, fixtures, transformer and installation. You can read more information about this special on the back of this flyer.

Landscape Design and Installation is really heating up. We have several landscape designers and registered landscape architects on our team ready to show off their landscape talents. Most of our designers use "Real Time" design software and can generate a 3-D, fully animated design of your property. I have been in the landscape business for over 25 years and I'm still impressed when I see what our designers can come up with! Please call to schedule a consultation and design. We must charge for designs because I can't convince our designers to work for free, but we will apply any design fees to your project. If you know what you want (for example, seven bushes, one tree and a 12 ft. x 12 ft. paver patio), then Dennis can usually give you a quote without a design fee.

Happening Right Now...

Sprinkler start ups are being scheduled now. Please call the office to schedule a day and time for your sprinkler start up. New sprinkler installs are underway and moving right along. We use RainBird products which come with a 5-year warranty (the best in the industry). Our crews are experienced, professional, polite, and knowledgeable.

It's not too late to sign up with a Full Maintenance Contract including your Spring Clean Up and Mulching. Call for a quick quote and explanation of services. With new technology, we can see a detailed photograph of your property on the internet and measure your turf and mulch bed square footage with our software program. Then we will e-mail you a quote for all of our basic services at no charge.

We offer financing on all improvements, such as Sprinkler Systems, Paver Patios, Retaining Walls and Landscape Installations. If we can't help you, we will try to refer you to someone who can.

We appreciate your business and look forward to having a Great 2013!

Thank you,
Joe Tekulve

Light Your Way Home!

Transform your home into one of the most beautiful homes on the street! Call us about a Sollos L.E.D. lighting system today. For \$2,700.00 we can design and install 12 fixtures and L.E.D. bulbs as well as a stainless steel transformer and an astronomic timer including wire and labor. The Astronomic timer knows when the sun sets and rises. We also offer financing and a prepay discount. L.E.D. lights have many other benefits, too; so please call to schedule a consultation meeting.

A Sollos lighting system installed by Paramount will set your home apart from the rest!

Your system will:

- Be supported by a 20-year warranty (on fixtures and bulbs).
- Provide state-of-the-art technology for an affordable price.
- Stay programmed all year long through the astronomic timer.
- Light your home and landscape with brilliant white light.
- Run 85% more efficient than traditional low voltage landscape lighting.
- Use only a fraction of the electricity as traditional bulbs; e.g., one traditional light bulb might cost \$113.00 in electricity for a year while an LED light might only cost \$17.00 in electricity for a year! This is a realistic example; and, if you multiply those figures by 12 fixtures, you can see the difference: \$1,356.00 per year to run 12 traditional lights and \$204.00 per year to run 12 LED lights.
- Highlight your home and provide improved curb appeal!

Please call Dennis for a quote!
