

LET'S GET THIS PARTY STARTED!

We hope everyone enjoyed their Holiday! I have to admit it's also nice when the Holidays finally come to a close so we can get back to a more normal schedule. Winter started right on schedule, and we had a chance to plow snow for the first time in two years. In line with normal "Cincinnati Weather," we will be installing a Sprinkler system for a customer on Monday.

We are making a few changes this year to the services we provide. One change is that we are only going to offer one fertilization program, Program III, which over 90% of our customers currently have anyway.

Program III

1. Early Spring Application

Early Spring fertilizer
Pre-emergent applied for crabgrass control

2. Late Spring Application

Late Spring fertilizer
Pre-emergent applied for crabgrass control
Broadleaf weed control

3. Summer Application

Early Summer fertilizer
Spot Broadleaf weed control
Surface insect and grub control

4. Late Summer Application

Late Summer fertilizer
Spot Broadleaf weed control as needed

5. Early Fall Application

Early Fall fertilizer
Broadleaf weed control

6. Late Fall Application

Late Fall fertilizer
Broadleaf weed control as needed

This program has produced excellent results for our customers' lawns for many years. Our applicators are licensed through the Ohio Department of Agriculture and go through extensive training and educational classes. If you do not currently have us take care of your fertilization service, please call the office and talk to Matt Archer (513-984-5200). He will give you a quote over the phone and send you a copy via e-mail or snail mail. He can also give you a quote for all services. These services can be bundled into a Full Maintenance Contract and performed for one low monthly payment. If you choose to prepay for any services for the entire year, you will receive a 5% discount.

HAPPENING RIGHT NOW...

Please call to schedule Spring services before the "Spring Rush" - Sprinkler start-ups, Fertilization, Aerification, Mulching/ Spring Clean-Ups, Mowing, Pruning, Bed Maintenance, etc.

Now is also a great time to schedule to have a landscape designed with one of our designers. The pricing is reasonable and the design fee will be credited towards your project. Our designer will give you a beautiful, comprehensive design. Your design can include: Pavers, Retaining Walls, Lighting, Water Features, Plants, Boulders, Outcropping, Fire Pits, Grill Islands, and much more.

LED Landscape Lighting is here to stay. LED lights use a fraction of the electricity as traditional bulbs. For example, one traditional light bulb might cost \$113.00 in electricity for a year while an LED light might only cost \$17.00 in electricity for a year! This is a realistic example; and, if you multiply those figures times 12 fixtures, you can see the difference: \$1,356.00 per year to run 12 traditional lights and \$204.00 per year to run 12 LED lights. For \$2,700.00 we can design and install a Transformer, 12 LED lights and Astronomic Timer including wire and labor to install! The fixtures and bulbs include a 20-year warranty. You don't need to change bulbs because the LED lights have a 20-year

warranty. You don't have to worry about a photocell going bad because there is no photocell. The Astronomic timer knows when the Sun sets and Sun rises. We also offer financing and a prepay discount. LED lights have many other benefits, too, so please call to schedule a meeting, consultation and installation.

We hope you enjoy your January, and good luck with those New Year's resolutions! We appreciate your business and hope 2013 is a healthy and happy year for you and your family.

Thank You,

Joe Tekulve
